# ACAIA PEARL

Black & White

Elegant and responsive, the Acaia Pearl is a professional quality scale that brings consistency and insight to your coffee brewing. With its minimal design, it is ideal for a wide range of uses, from daily morning brews at home to training labs and busy coffee bars.

This scale now features the 2.0 version of our Pearl firmware, adding auto timer start, beverage weight mode, and more.

- Weight/Timer Dual Display
- Customizable Smart Auto-off
- Mobile App Compatible via Bluetooth
- USB Rechargeable
- Firmware Upgradable
- Easily Calibrated

16cm x 16cm x 3.2cm. 462g  
Max 2000g Min 0.1g d=0.1g e=2d

# ACAIA LUNAR

The **Acaia Lunar** is designed for measuring espresso beverage weight, and has added water resistance and durability to survive in busy coffee bars. It includes auto timer and auto tare modes to improve workflow and allow more frequent weighing of shots without slowing down drink production.

The Lunar can be used with the **Lunar Portafilter Plate** to weigh coffee dose in a portafilter, or to weigh two cups for split doubles. The Lunar also makes a convenient travel scale for all forms of coffee brewing.

Weight/Timer Dual Display

Water Resistant

Durable

Customizable Smart Auto-off

USB Rechargeable

Mobile App Compatible via Bluetooth

Auto-Start, Stop, and Tare Features

10.5cm x 10.5cm x 1.55cm. 270g  
Max 2000g Min 0.1g d=0.1g e=0.5d

# LUNAR BASE

The **Lunar Base** is a fortified replacement base for the Acaia Lunar. The enlarged profile of the Lunar Base shields the scale from heat and moisture in shallow drip trays, and prevents drip tray lips and backsplashes from interfering with the movement of the scale's weighing surface.

The polycarbonate outer base also eases movement of the scale across slotted drip trays, a bonus for workflows that involve frequent repositioning of the Lunar.

11cm x 11cm x 7.8cm

# CARRYING CASE

Our carrying case for the Pearl and Lunar provides safe and sleek transport. A custom-fit EVA foam body and zipped closure helps you protect your scales while traveling.

The **Lunar Carrying Case** is specially designed to carry the Lunar, 100g Calibration Weight, and storage for a USB cord.

Pearl Carrying Case:  
16.9cm x 16.9cm x 5.4cm. 250g  
Lunar Carrying Case:  
16cm x 16cm x 5cm. 160g

# 500G CALIBRATION WEIGHT

A precision scale needs a precision calibration weight to match, so we decided to build our own. Ensure that your measurements are the same as your collaborators!

The **500g Calibration Weight** is built to F2 standards by Acaia and verified in our labs. The stainless steel is durable to ensure accuracy over time. It comes with an EVA foam case for protection during travel.

4.9cm x 4.9cm x 3.3cm. 500g  
Case Size: 8.0cm x 4.2cm  
Permissible Error: +/- 0.0075g

# TITAN BREW STAND

The **Titan Brew Stand** is designed to work with an Acaia Pearl scale to measure beverage weight during brewing.

Beverage weight can be used to standardize the amount of liquid coffee prepared, regardless of the amount of water retained by the ground coffee in the brewing device.

The Titan can also be used as a brewing stand for an Aeropress, and a Lunar can be substituted for the Pearl when necessary or convenient.

20.2cm x 20.2cm x 18.7cm. 728g

# ATLAS EXTRACTION STAND

The Atlas Extraction Stand is designed to track the movement of liquids during the brewing process when used in conjunction with a Lunar and Pearl scale. In this configuration, the Lunar displays live beverage weight, and the Pearl displays live brewing water weight.

## BREWBAR APP

When the two scales are connected to the **Brewbar App**, Brewbar provides a real-time visualization of the brewing process, beverage weight, liquid retained in the brewing device as well as water to dry coffee ratio of each.

It connects with four scales and a compatible grinder to help determine and replicate optimum recipes for your coffees. Available on iPad.

15.6cm x 12.2cm x 16.3cm. 395g

# BREWGUIDE APP

Discover beans and brewing prints from your favorite roasters and coffee lovers; read reviews, compose your own brew, or try to replicate their brews. Includes real-time display of flow rate, brew time, and a beautiful live graph. Available on iOS devices.

# BREWMASTER APP

For the coffee lover who wants to quickly visualize their brewing process with minimum fuss. A great option for espresso. Available on iOS devices.

# ACAIA LINKS

Acaia Links integrates the abilities of Acaia scales and apps with other coffee tools and equipment, creating new possibilities for measurement, consistency, and ease-of-use.
